NBN Co Objectives—a Re-Cap

Coverage	 Provide a wholesale service that enables competition and innovation by service providers throughout Australia
Competition	 Offer open access and equivalence, creating a level competitive playing field for retail service providers Facilitate any to any connectivity Promote maximum end-user choice in terms of both services and providers
Cost effective	 Simplicity Focus on uncontested infrastructure
Customer care	 Deliver appropriate network reliability, resilience and security Allow secure simultaneous delivery of multiple applications with predictable levels of quality

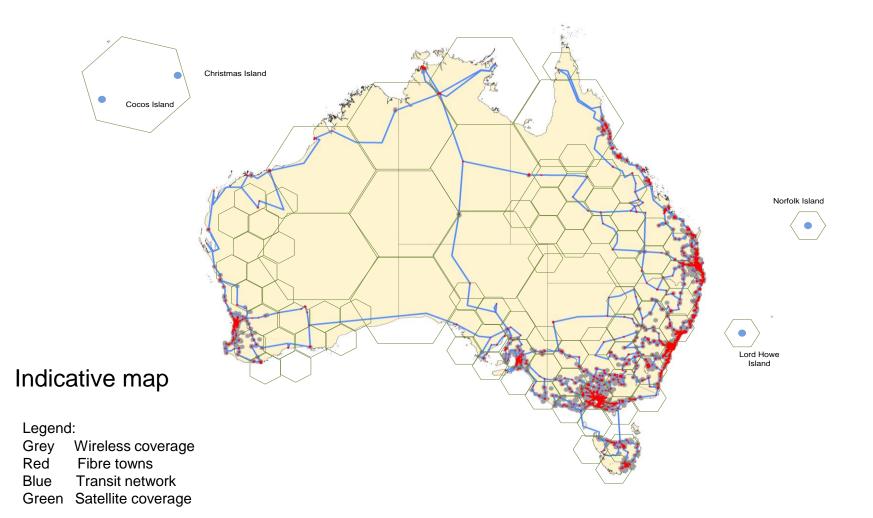

Full-Scale Construction Statistics

- Roll-out over approximately 9 years
- 10 million + premises in total
- Plus Greenfields (2 million +)
- 5,900 premises per day
- Contracted construction workforce of 15,000
 FTEs at the peak of construction
- Work on First Release Sites on the mainland has commenced & nearing completion
- Second release sites announced

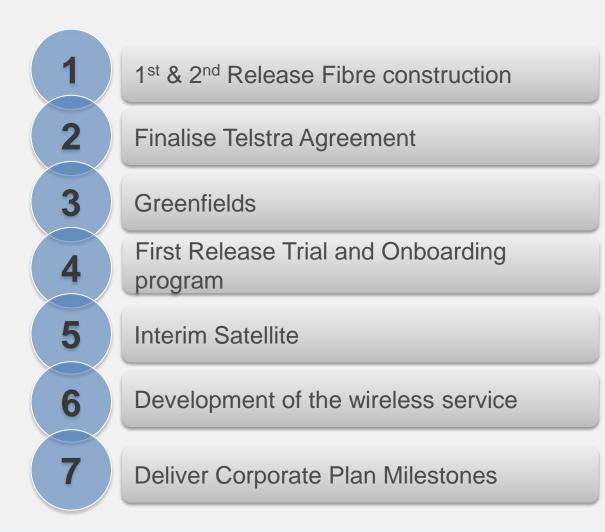

93% Fibre + 7% (Wireless + Satellite)

2011: Building, testing, onboarding

NBN Co National Update: Key Activities

ACCC Decision

ACCC decision regarding Points of Interconnect (POIs) required NBN Co review of network design to build new, and upgrade some old, parts of the network Eg. Utilising telephone exchanges as Fibre Access Nodes (FANs).

Telstra Negotiations

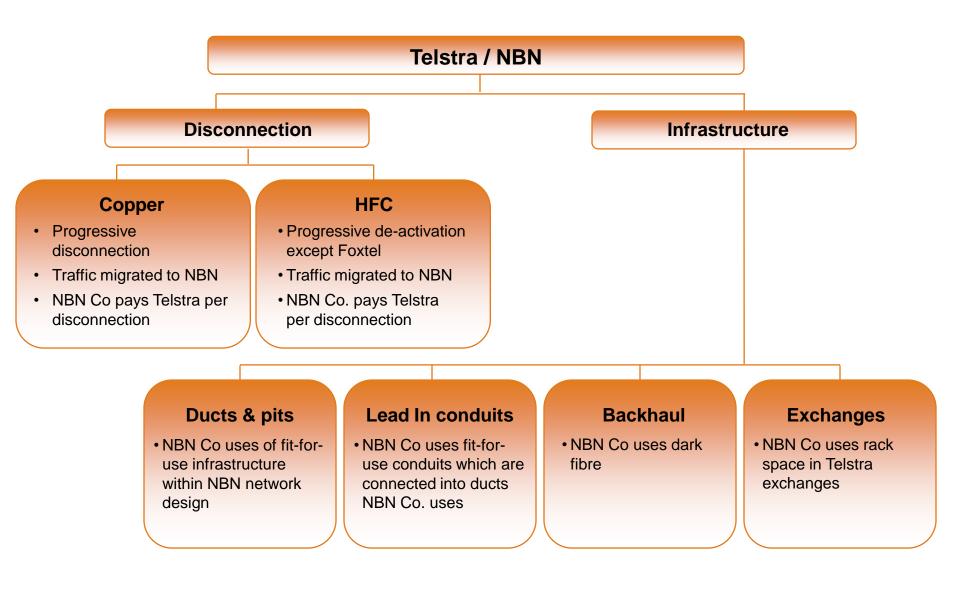

NBN Co negotiations to use Telstra infrastructure are close to being finalised The deal with Telstra will lead to less community disruption and reduce rollout costs It is therefore better for residents and better for taxpayers to await this agreement

Wireless

3 year construction roll-out 12Mbps down/1Mbps up

Satellite

Initial service roll-out scheduled for 3rd quarter 2011 NBN Co is designing and building its own Satellites

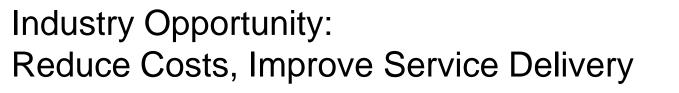

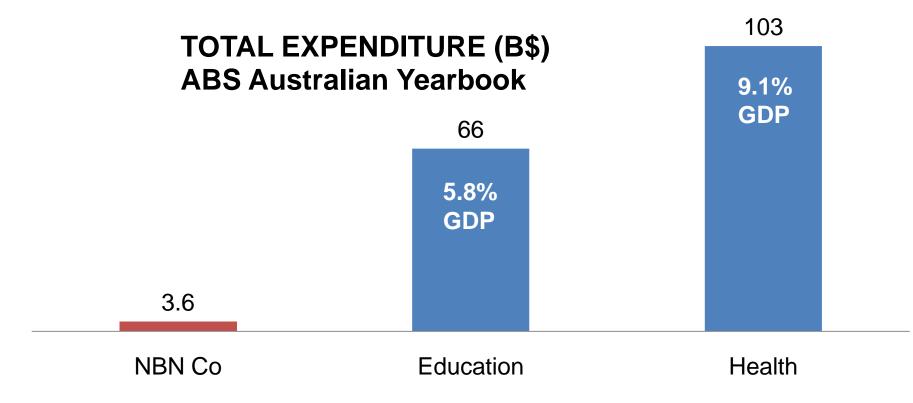

Ubiquity and Standardisation

- In the volume rollout, Retail Service Providers will be able to reach any customers in a region, using any of the three technology platforms
 - From the same Point of Interconnect
 - From the same network interface (NNI)
 - Using the same BSS interface
 - Using the same processes
 - At the same price for same/similar product
- Ubiquity with standard products/processes is critical for public applications such as eHealth and eEducation

As important as the speed and throughput improvements

Health Opportunities: Cost Savings, Improved Services

- Chronic Care
- In Home Aged Case
- Digital Health Records
- Self-help, Preventative
- Specialist Consultations

Video Consultations

Monitoring, Social Inclusion

Large Images, Ubiquitous Access

Information, Networks

Improved, Global Access

Pricing of Wholesale Services

1. Access price scale

(\$/month per Service - Excluding GST)

Downstream/ (Mbps)	Upstream/ (Mbps)	Fibre	Wireless	Satellite
12	1	\$24	\$24	\$24
25	5	\$27	-	-
25	10	\$30	-	-
50	20	\$34	-	-
100	40	\$38	-	-
250	100	\$70	-	-
500	200	\$100	-	-
1000	400	\$150	-	-

2. Connectivity pricing

- Connectivity is sold as capacity (Mbps) and can be seen as a **proxy for usage** (GB/month)
- Additional capacity is available to the RSP in increments that allows them to control their own quality of service

Premises Passed or Covered (incremental year-on-year)

	FTTP Brownfields	FTTP Greenfields Build	FTTP Greenfields BOT	Satellite First Release	Wireless	Total
June 2011	13,000	-	45,000	165,000	-	223,000
June 2012	132,000	7,000	120,000	-	14,000	273,000
June 2013	805,000	63,000	84,000	-	269,000	1,221,000
Total	950,000	70,000	249,000	165,000	283,000	1,717,000

Source: NBN Co

Note: Premises rounded to the next thousands.

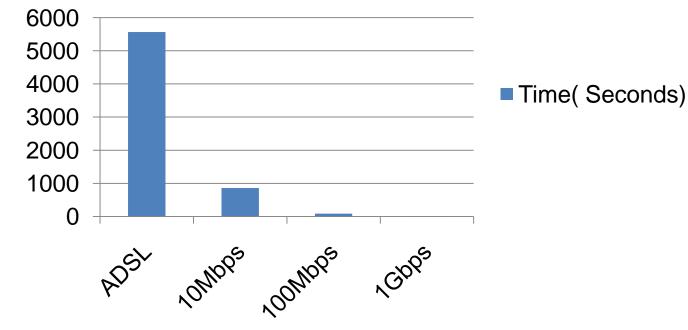

A premise is passed / covered when the shared network and service elements are installed, accepted, commissioned and ready for service which then enables an end user to order and purchase a broadband service from their choice of retail service provider.

Large File Transfer - 1 GB File

- Dial-up
- ADSL/T1
- ADSL2+
- Fibre
- Fibre

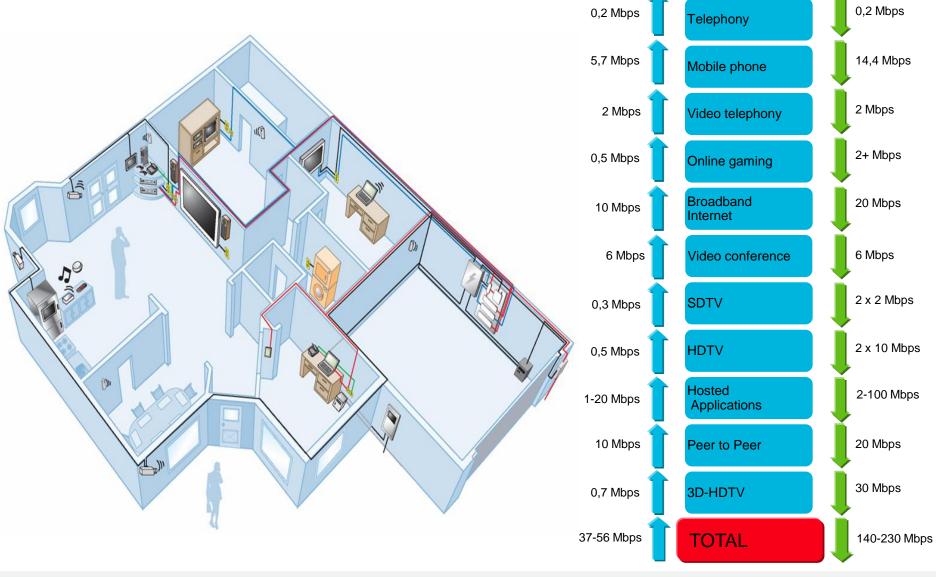

- 56kbps 42 Hours, 36 Minutes, 31 seconds
- 1.5Mbps 1 Hour, 32 Minutes, 43 seconds
- ~10Mbps 14 Minutes, 19 seconds
- 100Mbps 1 Minute, 25.9 seconds
- 1 Gbps 8.59 seconds

Residential bandwidth demand quickly reaches 100Mbits/sec

RDA engagement and Local Government planning

This checklist provides a guide for RDAs and local councils as to some of the information NBN Co and its contractors may need to assist in the NBN planning process.

- Zoning maps and planning controls
- Identification and location of heritage conservation areas and / or heritage items (both indigenous and non-indigenous)
- Location of environmentally significant areas e.g. conservation / protected areas, national parks / nature reserves, wetlands, bushland, significant street trees
- Any specific local planning controls, policies or codes that may apply specifically to telecommunication facilities
- Confirmation of any local exemptions, restrictions or prohibitions for telecommunication facilities
- Development application requirements (if necessary), including likely timeframes, processes etc.
- Location of Commonwealth land and education, health or government facilities
- Location of major development proposals and areas (e.g. greenfield sites), major infrastructure locations or areas that require major upgrades to infrastructure

First Release Site experience: Armidale

- Direct peak workforce of up to 140 people employed through the principal contractor and subcontractors
- Large number of local businesses benefited from direct and indirect participation:

Civil contractors	Environmental specialist & surveyor		
Electrical contractors	Waste removal companies		
Fabrications companies	Mechanical repairers		
Transportation companies	Hardware stores		
Concrete, sand, and soil suppliers	Office space & depot suppliers		
Plant & machinery hire	Local Ridgey Didge pie shop		

Community Engagement Guiding Principles

- Proactive and timely engagement of stakeholders
- Ensuring responsiveness to stakeholders
- Delivering and honouring commitments made
- Clear and timely provision of information
- Ensuring representativeness of stakeholders
- Timely and appropriate risk identification and issue escalation
- Continuous evaluation and improvement of community engagement activities

Co-investment & Network Extension

Co-investment Projects

- Opportunities for leveraging third party construction projects to reduce the community impact or cost of rolling out the FTTP network and the wireless network within the existing (or planned) footprint
- Engagement: State Governments, Utilities and Local Government
- Examples: Undergrounding Power, Network Maintenance/Upgrade, Streetscape Work, New Bridges, Roads or Rail corridors, Radio Towers, Land Developments (other than Greenfields)

Network Extension

- Propositions put forward by third parties to extend the 'fibre footprint' beyond the intended 93% coverage or extend the fixed wireless coverage by co-funding the establishment of additional infrastructure
- Engagement: State and Local Governments, Businesses, Individuals
- Framework under development

Co-investment Project – Key Principles

- 1. New Infrastructure or Upgrade/Maintenance Existing Infrastructure
- 2. In the planned Fibre or Wireless Footprint
- 3. No suitable Telstra infrastructure available in same location
- 4. Meets NBN Co Reference Architecture
- 5. Falls within the 3-5 Year Build Schedule
- 6. Simple Commercial Structures
- 7. Excludes Greenfields

NBN Co Fibre in New Developments (Greenfields)

- During the National Broadband Network rollout, an estimated 1.9 million new premises will be constructed across Australia.
- NBN Co will be providing fibre infrastructure to all new broadacre developments and infill developments of +100 premises within the NBN fibre footprint.
- NBN Co plans to pass around 320,000 premises in Greenfield estates by June 2013.

• Since 1 January 2011, NBN Co has received more than 200 online applications submitted by developers.
